User-: This game is the best I play this when I'm bored or when I just want to have fun and also I would love to have all the skins be the best. my experience is best because I love graphics and all the characters they look so cool, but one thing you might need to make some changes with trying to open your skin because you're just getting money isn't any skin I just got one or two skins I think aren't fair, but either than I think it's a 5e game all over the vast world I think. 2. User-: So far there was no one change when I stopped playing this game for a year. I tried it again and still had fun. There is still a lot of room for improvement, but I think the dev team couldn't do it. A reminder from my old review, I was showing forced ads after the game, although most of us in the game are watching the ad reward increase, so there's no need for it. Ads to watch also take time to load, unlike forced ones. I still have a lot to say, but at least pls consider them. 3. User-: I love this game. Played the old computer version as a kid. You take your chances with every shot. Rewards are better than any game out. But the best part is it's not a big game for you to play even with low memory. The graphics are great. Love the end of killing shots. Reminds me of Mortal Combat. No longer need to board when Bowmasters at my fingertips. Take your chance to feel great about rewarding yourself. The target is a computer or even real players. Start now It's free. Miss.
